EDUCATION

BITS Pilani, Dubai Campus

2024 – 2028

B.E. Computer Science · CGPA 8.61

Courses: Computer Programming, Data Structures & Algorithms, OOP, Database Systems, Discrete Structures, Logic in Computer Science, Digital Design, Microprocessors & Interfacing, Probability & Statistics, Engineering Mathematics

PROJECTS

BrandkitAI

Python, Flask, Ollama

- Type a business idea, get colours, fonts, a rough logo and a PDF.
- Runs on a local Llama model on my machine, so I don't need an API key.

Lama OS

React, TypeScript, Supabase

- One place I use for gym, DSA practice and project lists.
- Login with Google or email. Each account only sees its own data.

MarketMate

Next.js, TypeScript, Firebase, Gemini

- Stock tracker I built for myself first: log in with Google, add holdings and see live profit and loss.
- Quotes come through a small API I wrote so the app doesn't keep hitting the data provider.
- Gemini chat on the side talks about the actual portfolio. It will explain allocation; it won't tell you what to buy.

EXPERIENCE

Digital Media & Marketing Lead, Axiomaera

Feb 2026 – Jul 2026

- Part of the founding team. Planned and posted LinkedIn campaigns: graphics, copy and a simple weekly schedule so the page stayed active.
- Built a small HTML page that makes a matching email signature. The team used it instead of everyone designing their own.

Creative Executive, GDG on Campus, BITS Dubai

Aug 2025 – Jun 2026

- Made posters, slides and Instagram posts for workshops and hackathons.
- On event days I sat with the tech team and helped run the room.

Digital & Creative, Core Committee, BITS Sports Festival

Sep 2025 – Nov 2025

- Design and social for a campus-wide sports fest.
- Worked with other teams on deadlines that kept moving.

Intern, Institute for Career Studies

Jun 2024 – Aug 2024

- Edited article titles and meta text so career pages were easier to find on Google.

SKILLS

Python, Java, JavaScript, TypeScript, SQL, C

React, Next.js, HTML, CSS, Tailwind, Flask, Node.js, REST APIs, Git

Firebase, Supabase, MySQL

Ollama, Gemini

Figma, Illustrator, Canva, After Effects

CERTIFICATES

Programming for Everybody (Python) · Python Data Structures · Introduction to Front-End Development · Supervised Machine Learning: Regression and Classification
